

FOR IMMEDIATE RELEASE

RAYTEL Names Stan Gafner as its New President and CEO

SAN DIEGO (January 1, 2008) – RAYTEL, a leading provider of in-vehicle Bluetooth® hands-free mobile communications, multimedia and entertainment solutions, today announced that Vice President and Chief Operating Officer Stan Gafner has been named president and chief executive officer, replacing RAYTEL's preceding CEO Peter Bauer, who has stepped down to retire.

As RAYTEL's vice president and chief operating officer since June 2007, Gafner has been responsible for directing all areas of the business, from strategy development and sales and marketing, to customer support, financials and fundraising. As the company's president and chief operating officer, he will continue to assume many of his current responsibilities in a greater capacity and leadership position.

"I am honored to assume the role of president and chief executive officer for RAYTEL Corporation," said Gafner. "This is an exciting time for our company as we unveil our new EGO line of Bluetooth hands-free multimedia car kits. The mobile communications industry is ever changing, and we recognize the tremendous opportunity for EGO in the marketplace today and tomorrow."

Gafner brings over 30 years of experience to RAYTEL, specializing in business development of startup technology and telecommunications companies. Prior to joining RAYTEL, Gafner was co-founder and director of NuPhone L.L.C., as well as co-founder, president and chief executive officer of the high-tech development and manufacturing enterprise of end-to-end fiber-optic communications networks, PurOptix Inc.

RAYTEL's new EGO line ranges from a plug-and-play device for hands-free cell phone usage, to a fully equipped multimedia and GPS system that has high-definition video capabilities. Featuring an appealing and compact design, as well as Bluetooth audio streaming (A2DP), speech-to-text and text-to-speech technology, EGO has raised the bar for Bluetooth hands-free car kits in the marketplace today.

The EGO product portfolio will be showcased at the 2008 International CES (booth # 6624 North Hall), in Las Vegas, Jan. 7th to 10th.

About RAYTEL

RAYTEL Corporation offers advanced Bluetooth-enabled communication devices that provide drivers with hands-free communications, multimedia and entertainment accessibility in their vehicles for enhanced safety, convenience and enjoyment. Combining more than 65 years of expertise, RAYTEL is the American distribution partner of Funkwerk Dabendorf (FwD), a wholly owned subsidiary of Funkwerk AG, a German public company and one of the leading manufacturers of mobile communication systems in Europe.
